RESPONSE

The Honorable Commissioner of
Patents and Trademarks
Washington, D.C.

Dear Sir:

After rereading the application as mailed June 29, 2002 in light of the office action mailed 10,16 2002, I've found there is need for changes and yet while remaining within scope of the matter as had been presented. So in an effort to redress the need for changes I am sending a further corrected application for your examination. Please accept this application for consideration and if there are fees send them to me so I may cover the charges and have this application entered. Also I have renumbered the application with whole numbers. In the remarks section I have attempted an explanation of what I've done. On a copy of the application which illustrates the changes, the wording that is to be retained is shown in bold print, the wording that is to be removed is shown in fine print and in brackets, and the wording that is to be inserted is shown underlined plus in bold print. In the claims I have reshuffled passages. Movement of the passages in the claims was difficult to reveal as, although I was doing my best to retain original import, passages needed to be adjusted to fit the context of their new locations, so additionally I have used variations in font and coloration of font to emphasize the changes there. Lastly, I felt it necessary to split the original claim 3 into two claims, 3 and 4.

Please find in this mailing one application copy, 60 pages, illustrating corrections to the Dec. 13 application, and one application copy, 58 pages as corrected, the two copies separated by a descriptive separator sheet..
